GO:BP enrichment ... top 3 terms per cluster
(background: Seurat HVGs)
regulation of actomyosin structure organization
regulation of actin cytoskeleton organization
regulation of supramolecular fiber organization
behavior
positive regulation of neuron differentiation
regulation of cell−matrix adhesion
regulation of endopeptidase activity
regulation of cellular component organization
positive regulation of cell−matrix adhesion
neuron migration
fear response
regulation of steroid metabolic process
epithelial cell proliferation
positive regulation of cell−substrate adhesion
phosphorylation
phosphate−containing compound metabolic process
cell−cell adhesion via plasma−membrane adhesion molecules
positive regulation of lipid biosynthetic process
positive regulation of lipid metabolic process
glycolipid biosynthetic process
glycolipid metabolic process
liposaccharide metabolic process
alpha−beta T cell activation
