GO:BP enrichment ... top 5 terms per cluster
(background: Seurat HVGs)
regulation of actomyosin structure organization
regulation of actin cytoskeleton organization
regulation of supramolecular fiber organization
cardiac muscle cell differentiation
cardiocyte differentiation
behavior
regulation of neuron differentiation
positive regulation of neuron differentiation
circulatory system development
regulation of cell−matrix adhesion
regulation of endopeptidase activity
regulation of cellular component organization
positive regulation of cell−matrix adhesion
cell−matrix adhesion
regulation of lipid metabolic process
neuron migration
fear response
regulation of steroid metabolic process
cell adhesion
negative regulation of epithelial cell proliferation
regulation of lipid biosynthetic process
positive regulation of MAP kinase activity
positive regulation of cell−substrate adhesion
retina development in camera−type eye
regulation of anatomical structure size
phosphorylation
phosphate−containing compound metabolic process
phosphorus metabolic process
cell−cell adhesion via plasma−membrane adhesion molecules
generation of neurons
cell−cell adhesion
regulation of calcium−mediated signaling
positive regulation of lipid biosynthetic process
positive regulation of lipid metabolic process
carbohydrate derivative biosynthetic process
glycolipid biosynthetic process
glycolipid metabolic process
liposaccharide metabolic process
membrane lipid biosynthetic process
alpha−beta T cell activation
