GO:BP enrichment ... top 3 terms per cluster
(background: all SCENIC+ regulon targets)
regulation of actomyosin structure organization
cardiac muscle cell differentiation
regulation of actin cytoskeleton organization
positive regulation of neuron differentiation
regulation of cell−matrix adhesion
positive regulation of cell−matrix adhesion
regulation of cellular component organization
neuron migration
regulation of steroid metabolic process
fear response
negative regulation of angiogenesis
regulation of lipid biosynthetic process
epithelial cell proliferation
T cell differentiation
positive regulation of cell−substrate adhesion
regulation of anatomical structure size
cell−cell adhesion via plasma−membrane adhesion
cell−cell adhesion
positive regulation of lipid biosynthetic process
post−transcriptional regulation of gene expression
glycolipid biosynthetic process
glycolipid metabolic process
liposaccharide metabolic process
alpha−beta T cell activation
