GO:MF ... top 5 terms per cluster
(background: Seurat HVGs)
protein domain specific binding
protease binding
protein heterodimerization activity
enzyme activator activity
enzyme regulator activity
GTPase regulator activity
DNA-binding transcription repressor activity, RNA
DNA-binding transcription polymerase II-specific repressor activity
GTPase activator activity
sequence-specific double-stranded DNA binding
phosphatidylinositol binding
sequence-specific DNA binding
protein dimerization activity
PDZ domain binding
protein-macromolecule adaptor activity
identical protein binding
molecular adaptor activity
RNA binding
cell adhesion molecule binding
calcium ion binding
signaling adaptor activity
lipid kinase activity
protein kinase binding
protein tyrosine phosphatase activity
metalloendopeptidase activity
metallopeptidase activity
hydrolase activity, hydrolyzing O-glycosyl compounds
hydrolase activity, acting on glycosyl bonds
glycosyltransferase activity
cytoskeletal motor activity
UDP-glycosyltransferase activity
hexosyltransferase activity
G protein-coupled amine receptor activity
microtubule motor activity
