ARC.STAT3.clusters
regulation of cell−matrix adhesion
nephron development
kidney development
renal system development
positive regulation of cell−matrix adhesion
regulation of cell junction assembly
cell−cell adhesion via plasma−membrane adhesion molecules
regulation of epithelial cell migration
negative regulation of stress fiber assembly
ureteric bud morphogenesis
mesonephric tubule morphogenesis
homophilic cell adhesion via plasma membrane adhesion
positive regulation of MAP kinase activity
glycerolipid biosynthetic process
regulation of small GTPase mediated signal transduction
axon guidance
neuron projection guidance
small GTPase mediated signal transduction
Ras protein signal transduction
regulation of Ras protein signal transduction
glycoprotein metabolic process
glycoprotein biosynthetic process
glycolipid biosynthetic process
mucopolysaccharide metabolic process
chondroitin sulfate metabolic process
fibroblast growth factor receptor signaling pathway
epithelial to mesenchymal transition
negative regulation of neurotransmitter transport
regulation of cellular response to oxidative stress
regulation of response to oxidative stress
