ARC.STAT3.subset._+_+.clusters
positive regulation of ERK1 and ERK2 cascade
positive regulation of cholesterol biosynthetic process
lipid phosphorylation
positive regulation of sterol biosynthetic process
mucociliary clearance
organ growth
positive regulation of epithelial cell proliferation
regulation of epithelial cell migration
glycoprotein biosynthetic process
positive regulation of neuron differentiation
regulation of neuron differentiation
multicellular organismal response to stress
negative regulation of receptor signaling pathway via JAK-STAT
regulation of cellular response to oxidative stress
mucopolysaccharide metabolic process
glycosaminoglycan metabolic process
aminoglycan metabolic process
regulation of neurotransmitter levels
neurotransmitter transport
positive regulation of cell−matrix adhesion
gluconeogenesis
hexose biosynthetic process
monosaccharide biosynthetic process
regulation of cell junction assembly
chondroitin sulfate biosynthetic process
positive regulation of endothelial cell proliferation
regulation of endothelial cell proliferation
endothelial cell proliferation
positive regulation of adipose tissue development
regulation of adipose tissue development
podosome assembly
positive regulation of mast cell activation involved in immune response
positive regulation of mast cell degranulation
negative regulation of neurotransmitter transport
regulation of neurotransmitter transport
