ARC.STAT3.subset._−_−.clusters
regulation of mitochondrial membrane potential
purine ribonucleoside triphosphate metabolic process
ribonucleoside triphosphate metabolic process
negative regulation of binding
regulation of reactive oxygen species metabolic process
positive regulation of cell−matrix adhesion
regulation of cell−matrix adhesion
positive regulation of cell−substrate adhesion
nephron development
regulation of cell−substrate adhesion
calcium ion transmembrane import into cytosol
intracellular calcium ion homeostasis
calcium ion homeostasis
calcium ion transmembrane transport
trans−synaptic signaling by
trans−synaptic complex
glycolipid biosynthetic process
glycolipid metabolic process
liposaccharide metabolic process
membrane lipid biosynthetic process
membrane lipid metabolic process
G protein−coupled glutamate receptor signaling pathway
short−term memory
negative regulation of amino acid transport
regulation of glutamate secretion
negative regulation of organic acid transport
regulation of synaptic
dopaminergic
apoptotic signaling pathway via death
synaptic transmission, dopaminergic
regulation of synaptic transmission, GABAergic
