GO:MF ... top 3 terms per cluster
(background: Seurat HVGs)
protein domain specific binding
protease binding
protein heterodimerization activity
DNA−binding transcription repressor activity, RNA polymerase II−specific
DNA−binding transcription repressor activity
GTPase activator activity
protein−macromolecule adaptor activity
identical protein binding
cell adhesion molecule binding
calcium ion binding
signaling adaptor activity
lipid kinase activity
metalloendopeptidase activity
metallopeptidase activity
glycosyltransferase activity
UDP−glycosyltransferase activity
hexosyltransferase activity
microtubule motor activity
